Projects

Demand Response - Enel X

Enel X offers an innovative service known as Demand Response which allows commercial and industrial consumers to access the dispatching services market (MSD), modulating their energy consumption, with the aim of responding to peaks in electricity supply or demand, and allowing for greater flexibility and network stability. The contribution to modulation may come from a reduction in consumption or an increase in the production of any assets. The capacity offered to the market, especially if characterized by a high degree of flexibility and if managed in an aggregate form, acquires systemic and economic importance of interest to consumers.

FitPrime TV

Fitprime TV is Fitprime's home workout platform. Entirely dedicated to on-demand, podcast and live workouts, the latter allows you to get back in shape whenever and wherever you want. The result of collaboration with partner centers and the best trainers in the sector, the portal is constantly updated and offers you workouts for many different disciplines every day, which you can share with friends and family.

WhatsApp Business Clienti Verisure

The WhatsApp Business API, designed for medium and large companies, revolutionizes the way you communicate with customers, wherever they are, and allows you to interact with them via WhatsApp in a simple, safe and reliable way.

EHC - Enav Human Capital

It manages ENAV personnel according to the characteristic aspects of the CCNL, and also feeds the standard eBS HR master data asynchronously. It manages information such as: personal data, addresses, training, employment relationships, requests for permits, CVs, medical visits and much more) It calculates the items of the paycheck amounts, which then sends to the external payroll system, which processes the information to determine the paycheck.
